

## LODGE SOUTHERN – PROJECT DATA SHEET

**Project:** St Thomas Pain Management and Phlebotomy

**Client:** Guy's and St Thomas' NHS Foundation Trust

The Pain Management and Phlebotomy department was on the ground floor of the Lambeth Wing at St Thomas Hospital. The Trust relocated the department temporarily to enable a full refurbishment and improvement to the facility.

During the 12 week contract we completely stripped out the existing finishes and fittings including internal partitions and ceilings to enable the construction of the new phlebotomy bays. The existing consulting rooms were retained but all finishes were renewed as part of the project. New M&E services, fire alarms, CCTV and access control were included as part of the works.
